## WIRELESS SETTINGS

Adjust settings for connection to wireless networks.

| Option | Description |
|---|---|
| **GENERAL SETTINGS** | Choose a name (**NAME**) to identify the camera on the wireless network (the camera is assigned a unique name by default) or select **RESET WIRELESS SETTINGS** to restore default settings. |
| **RESIZE IMAGE FOR SMARTPHONE** 🅜 | Choose **ON** (the default setting, recommended in most circumstances) to resize larger images to 🅜 for upload to smartphones, **OFF** to upload images at their original size. Resizing applies only to the copy uploaded to the smartphone; the original is not affected. |
| **ACCESS POINT SETTINGS** | • **SIMPLE SETUP**: Connect to an access point using simple settings.<br>• **MANUAL SETUP**: Manually adjust settings for connection to a wireless network. Choose the network from a list (**SELECT FROM NETWORK LIST**) or enter the name manually (**ENTER SSID**). |
| **IP ADDRESS** | • **AUTO**: The IP address is assigned automatically.<br>• **MANUAL**: Assign an IP address manually. Manually choose the IP address (**IP ADDRESS**), network mask (**NETMASK**), and gateway address (**GATEWAY ADDRESS**). |

## GEOTAGGING SET-UP

View location data downloaded from a smartphone and choose whether to save the data with your pictures.

| Option | Description |
|--------|-------------|
| **GEOTAGGING** | Choose whether location data downloaded from a smartphone are embedded in pictures as they are taken. |
| **LOCATION INFO** | Display the location data last downloaded from a smartphone. |

## instax PRINTER CONNECTION SETTING

Adjust settings for connection to optional FUJIFILM instax SHARE printers.

**The Printer Name (SSID) and Password**

The printer name (SSID) can be found on the bottom of the printer; the default password is "1111". If you have already chosen a different password to print from a smartphone, enter that password instead.

## PC SHOOT MODE

Adjust settings for remote photography (tethered shooting).

| Option | Description |
|--------|-------------|
| **OFF** | Choose this option if you do not intend to use tethered shooting. |
| **USB AUTO** | Tethered shooting mode is selected automatically when the camera is connected to a computer via USB. When no computer is connected, the results are the same as **OFF**. |
| **USB FIXED** | The camera functions in tethered shooting mode even when not connected to a computer. At default settings, pictures are not saved to the memory card, but pictures taken while the camera is not connected will be transferred to the computer when it is connected. |
| **WIRELESS FIXED** | Choose this option for wireless remote photography. Select a network using **D CONNECTION SETTING** > **WIRELESS SETTINGS**. |

⚠ **D POWER MANAGEMENT** > **AUTO POWER OFF** also apply during tethered shooting. Select **OFF** to prevent the camera turning off automatically.

◆ Tethered shooting is available with software such as HS-V5 (available separately) or FUJIFILM X Acquire (available for free download from the FUJIFILM website) or when the FUJIFILM Tether Shooting Plug-in PRO or Tether Shooting Plug-in (both available separately) is used with Adobe® Photoshop® Lightroom®.
